

पहला लीटर हमारी ओर से

Acquisition, conversion and retention campaign — Lucknow pilot

20 August 2026 · PYAAS Dairy Private Limited · built strictly on Work Order 5347/LMU/Vipanan/Navin-Vitarak/2024-25 dated 13.08.2026

0. Management recommendation

Run Option C — the earned second pack, delivered at the paid transition. One free 500 ml pack on the first morning, with no payment required. The second free pack is released by the first wallet recharge and **arrives with the customer's first paid delivery.**

Why this beats a straight giveaway. A free litre handed over at signup buys a download and a morning of goodwill, then presents the customer with a cliff: the milk stops unless they pay. Option C removes the cliff. The customer proves the service works before spending anything, and the moment they do spend, the milk that arrives is partly free again. **The recharge is not the end of the gift — it is what unlocks the rest of it.**

It also does the two things a giveaway cannot. **Anyone gaming the offer gets 500 ml, not a litre** — half the prize for the same effort, which is usually enough to make it not worth doing. And the second pack gives the recharge prompt something to offer instead of merely asking.

	Option A · two free mornings	Option B · litre on day one	Option C · earned second pack
Wallet conversion	Weakest — the ask lands after the gift is banked	Weak — asks on day 2, too fast	Strongest — the ask carries a reward
Abuse exposure	Highest — full litre before any commitment	High	Lowest — freeloaders get half
Delivery cost of the promotion	₹30 (two unpaid drops)	₹15	₹15
Service proof before paying	Two mornings	One morning	One morning, then continuity
Clarity	Highest	High	Adequate — requires disclosure discipline

The one thing that must be right for Option C to be lawful as well as effective: every condition — that a subscription is needed, that the second pack requires a recharge, the amount, the area, one per household — appears **before** the customer starts registering. Not in fine print, not after. §16 sets this out against the CCPA's dark-pattern guidelines, which are under active enforcement.

And a warning that outranks the campaign. At ₹4.70 per litre against a ₹15 delivery drop, a household must take **3.19 litres per delivery** before the drop pays for itself. Typical households take 0.5 to 1.5. **A campaign that succeeds at acquiring one-litre-a-day subscribers loses money faster than one that fails.** Run it society by society, push alternate-day delivery, and judge it on litres per drop and basket attachment — not on installs.

1. Work-order entitlement — what is actually granted

Read in full, all three pages. **The promotional entitlement is a single handwritten insertion,** placed immediately after clause 04 on page 1:

"आनलाइन 01 उपभोक्ता बनाने पर 01 ली0 FCM इक्स्ट्रा निःशुल्क दिया जायेगा ।"

On creating one online consumer, one litre of FCM extra will be given free of cost.

1.1 Extracted terms

Item	What the work order says	Clause
Promotional quantity	One litre per online consumer created	04, handwritten
Product	FCM — Full Cream Milk. Not toned, not any other SKU	04, handwritten
Billing treatment	निःशुल्क — free of cost. No billing mechanism, claim process or reconciliation is described	04, handwritten
Geographic limit	Lucknow city — the appointment itself is for online sale in Lucknow city	Opening paragraph
MRP condition	"There shall be no change in quality and MRP"	18
Campaign period	Not stated. The work order and agreement run three months	14, 23
Route limitation	Product is sold on the distributor's allotted area/route	05
Returns	Expired and leftover goods are not taken back	04
Advance payment	Full advance, one day prior ; no credit D.I. in any circumstance	05, 06, 12, and the page-2 direction

1.2 What the work order does not say — and it is most of it

This is the central compliance finding. The entitlement is granted in one line and almost none of the operating terms are specified.

Not specified	Why it matters
Pack configuration	The work order says <i>one litre FCM</i> . It does not say two 500 ml packs . Options A and C both depend on two separate packs
What "consumer created" means	Registration? First order? First recharge? This decides how many litres you may claim and when
Claim, issue and reconciliation process	You cannot reconcile an entitlement with no stated mechanism
Whether it is one-time or repeatable per consumer	Reads as once per consumer; not stated
Total cap on litres over the POC	No ceiling stated — and no assurance there is not one
Whether the allowance survives the POC	Not stated
Approval requirement for campaign creative	Not stated in the work order
Branding conditions	Not in the work order. Your own application of 06.08.2026 undertook that the app runs under PYAAS branding and that the Parag identity appears only to identify the product, with prior approval
Reporting obligations for the promotion	None stated
Restrictions on advertising the offer	None stated — which is not the same as permission

1.3 The ambiguity that blocks the design

"One litre FCM" is not "two 500 ml packs."

The business understands it as 2 × 500 ml. The work order does not say so, and clause 18 separately records that FCM 500 ml is being replaced by **450 ml** "when available in the Sanstha." So the litre could arrive as:

- 2 × 500 ml — the assumed case, and the only one on which Options A and C work as designed
- 1 × 1 L pack — FCM 1 L exists on the rate list at ₹71.00. **A single pack cannot be split across two mornings**
- 2 × 450 ml — which is 900 ml, not a litre

Confirm the pack configuration in writing before any material is printed. If it is a single 1 L pack, Option C collapses into Option B and the campaign must be redesigned. This is the first question in §19.

1.4 Promotional value

Invoiced cost to PYAAS	₹0 — the Sanstha does not bill it
Promotional value at MRP	₹72.00 (FCM 500 ml × 2 at ₹36.00)
If issued as 1 × 1 L	₹71.00

MRPs derived from the Parag rate list and corroborated against clause 01 — the list's price columns resolve to MRP, less ₹3.00/L agent commission, less ₹1.00/L transport, pro-rated exactly by pack size on five of six SKUs tested. **The rate list is an OCR'd scan; confirm against a clean copy before printing any figure.**

Do not treat the milk as costless in the model. It is free to you and worth ₹72 to the customer, and both numbers belong in the accounts — see §12.

2. Campaign strategy

2.1 The proposition

Parag milk you already trust, delivered to your door by PYAAS, with the farm record on every pack.

The brand separation matters and must hold in every asset: **Parag makes the milk; PYAAS delivers it, runs the app, the subscription and the wallet.** Never imply PYAAS manufactures it.

2.2 The strategic idea

Spend the litre where the friction is.

Step	Friction for a household that has never heard of you	Spend here?
Download the app	Low — free, thirty seconds	No
Register	Low	No
First wallet recharge with own money	Highest	Yes
Commit to a daily subscription	Medium	Partly
Still be there on day 7	Medium — habit not yet formed	Yes

Nothing is given for downloading. **The download is a means, not an achievement**, and paying for it in milk wastes the only currency the campaign has.

3. The three options compared

Option A — two free trial mornings

One 500 ml pack on each of two separate mornings, then customer-funded deliveries.

Option B — one free litre on the first morning

Both packs together after subscription activation.

Option C — earned second pack (recommended)

Pack 1 free on the first morning. Pack 2 released by the first wallet recharge and delivered **with the first paid delivery.**

Dimension	A	B	C
Install conversion	Same across all three — the offer headline is identical	Same	Same
Subscription conversion	High	High	High
Wallet conversion	Low — gift already banked	Medium-low — ask is abrupt	High — the ask carries the reward
Day-7 retention	Medium	Medium	High — paid transition is cushioned
Day-30 retention	Medium	Medium	Higher , if service holds
Abuse risk	High — full litre, no commitment	High	Low — half the prize
Operational complexity	Medium — two unpaid drops	Lowest	Medium — conditional release
Customer clarity	Highest	High	Adequate; disclosure must be exemplary
Work-order compliance	Equal — none is addressed either way	Equal	Equal
Consumer-law risk	Low	Low	Medium — conditional offer, so disclosure carries the weight
Promotional delivery cost	₹30	₹15	₹15

Recommendation: Option C, on the condition that §16's disclosure standard is met in full. If the pack turns out to be a single 1 L unit, **fall back to Option B** and move the recharge ask to the evening of the first delivery.

4. Recommended mechanics

- D0 Reach → download → register → serviceability check → subscribe
No payment. No wallet balance required.
- D1 FIRST DELIVERY — 500 ml FCM, free.
07:00. The service proves itself before any money changes hands.
- D1 07:30 delivery confirmation · 10:30 cut-off reminder
"Recharge by 12 noon to continue tomorrow — and your second free pack comes with it."
- D2 PAID DELIVERY + 500 ml FCM free.
The first morning they pay for is also a morning they get milk free.
- D3+ Normal subscription. Basket nudge from D10.

Why the second pack travels with the first paid delivery. The sharpest churn moment in any free trial is the transition from free to paid. Option C puts the second gift precisely on that boundary, so the

customer never experiences a morning that is worse than the one before.

The cut-off is real and works in your favour. Orders lock at **12 noon** for the next morning (clause 12 requires the advance one day prior). A customer who receives free milk at 7 am has until noon to recharge — five hours, while the experience is fresh. **That urgency is genuine, not manufactured**, which is exactly what distinguishes it from the false-urgency dark pattern.

Grace: the second pack remains claimable for **7 days** from the first delivery. Push hard on day 1; do not punish a customer who recharges on day 3.

Minimum recharge: ₹500. Roughly eight days of toned milk at ₹59/L — long enough for a morning routine to form, which is the only thing that makes a milk subscription stick. **If registration-to-recharge conversion runs below 25%, drop the gate to ₹300** and change nothing else.

Minimum subscription: none contractual. The customer may cancel at any time and the wallet balance is dealt with under the published terms. **Do not impose a lock-in** — a subscription trap is one of the thirteen named dark patterns, and the retention argument in this campaign is service, not entrapment.

5. Day 0-30 journey

Day	Delivery	Communication	Purpose
D0	—	Subscription confirmed: plan, start date, exactly what is free and what is not	Set expectation
D1	500 ml FCM free	07:30 delivered + QR prompt · 10:30 cut-off reminder with the recharge offer	Prove service · convert
D2	Paid + 500 ml FCM free	"Your second free pack is with today's delivery"	Cushion the paid transition
D3	Paid	Short experience check — one question, one tap	Catch dissatisfaction early
D4-D6	Paid	Silence unless something goes wrong	Reliability is the message
D7	Paid	"One week of mornings." Pause/resume explained	Progress marker · reduce cancel-by-friction
D8-D9	Paid	Wallet balance visible in-app; no push unless low	—
D10	Paid	Basket nudge — ghee	Where the economics are
D12-D14	Paid	Low-balance ladder if cover < 4 days	Prevent the involuntary break
D15	Paid	Referral invitation — neighbours on the same street	Density, the only lever on delivery cost
D21	Paid	Second basket nudge — paneer or khoa	Basket
D30	Paid	Monthly summary: litres, deliveries on time, farms your milk came from	Substantiated pride, not a discount

Behavioural principles, used honestly. Commitment and consistency — the customer chooses a plan before receiving anything. Endowment — the second pack is theirs to claim, described as such. Progress — the day-7 and day-30 markers. Loss aversion — the low-balance reminder describes a real

consequence, a missed delivery, and never invents scarcity. Social proof — only claims you can substantiate from your own data.

What is deliberately absent: countdown timers, "only N litres left", pre-ticked add-ons, and any interface that makes declining feel foolish.

6. Stage detail

6.1 Awareness

Channels. Society activation stalls · lift posters · door hangers · society WhatsApp groups via the RWA · the existing website waitlist, which already collects email and pincode and **which nobody has yet contacted.**

Do not buy broad digital reach. The service is geo-fenced to a few societies; advertising outside it spends money to create disappointment and burns free litres on households you cannot serve.

Trust signals, all substantiable: the Parag name and the Lucknow Milk Union appointment · the QR farm record on every pack · pause or cancel any time · FSSAI licence number · a support number that is answered.

6.2 App download

QR → Google Play, `in.pyaasdairy.app` · One short link per society, so scans are attributable by location.

iOS is not live. Say "Android" on every asset. An iPhone user who scans should reach a page that captures their number for notification — not a dead end and not a false promise.

⚠ **Blocking dependency.** The website currently says the app is "*launching soon on iOS and Android*" while the Android app has been live since 5 August. **Every leaflet drives to a QR; a household that lands on that page is lost at the final step.** Command W-19 in the developer fix file must ship before anything is printed.

Onboarding fields — required: mobile number, OTP, delivery address with pincode. **Optional:** name, email, household size. **Nothing else.** Demanding information the service does not need is *Forced Action*, one of the dark patterns the CCPA has actually penalised.

Offer disclosed before registration begins, on the landing screen — not after the customer has invested effort.

6.3 Subscription activation

Plan: daily or alternate-day, Toned or Full Cream, 500 ml or 1 L. **Alternate-day should be presented as an equal option, not buried** — two litres in one drop halves the delivery cost per litre and is the difference between a viable route and an unviable one.

Start date: the next morning if registered before **12 noon**, otherwise the morning after.

Eligibility validated at subscription: pincode in zone, mobile not previously redeemed, address not previously redeemed.

Cancellation: any time, in the app, in two taps. Wallet balance handled per published terms.

6.4 Wallet recharge

Preset	Days of toned 1 L at ₹59	Days of FCM 1 L at ₹71
₹300	~5	~4
₹500 ← unlocks the second pack	~8	~7
₹1,000	~17	~14
₹2,000	~34	~28

Show the days, not just the rupees. "₹500 ≈ 8 mornings" is the only framing that means anything to a household.

Do not make one tile visually dominant. Giving the largest amount disproportionate prominence is *Interface Interference* — named in the CCPA's June 2026 enforcement.

Payment: UPI intent, with dynamic QR as fallback. **UPI Collect is withdrawn for merchant transactions and must not be built.**

Failure recovery: immediate retry link; the message must state the true gateway position and never assert "no money was deducted" unless the gateway confirms it.

Disclosures at the recharge screen, before payment: what the balance may be used for, that promotional credit is not refundable in cash, how refunds on closure are computed, and expiry if any. **Do not describe the balance as refundable, transferable or non-expiring unless the published terms say so** — your `/terms` refunds the wallet *net of amounts due and non-refundable promotional credits*, and the app must say the same thing.

UPI AutoPay is a separate project. Do not offer it in this campaign and do not describe a saved payment preference as a mandate.

6.5 Retention

Delivery confirmation each morning · pause, resume and holiday controls reachable in two taps · quantity change effective from the next cut-off · low-balance ladder at four days of cover · service recovery within published support hours with quality and safety escalated to a human immediately, any hour · win-back only after the 90-day post-opt-out bar has cleared · monthly summary of litres, on-time deliveries and named farms.

Retention here is reliability, not discounting. A subscriber who receives milk at 7 am every morning for thirty days does not need an offer to stay.

7. Fraud and abuse controls

Control	Rule
One offer per mobile	Verified by OTP; the number is the redemption key
One offer per address	Normalised address plus geocode within ~25 m; flag, do not auto-block
Device signals	Device ID and install source; flag repeat installs across many numbers
OTP abuse	Rate-limit per number and per device; escalating cool-down
Referral abuse	Reward released only after the referred household's first paid delivery , never on signup
Multiple accounts	Same address plus same device plus same UPI handle → manual review
Cancel-after-free	Track free-to-cancel rate by promoter and by society; it is a promoter-quality signal before it is a customer problem
Reversed payments	Second pack released only on settled funds, not on payment initiation
Proof of delivery	OTP or photo at handover for every promotional pack
Promoter misuse	Promotional stock issued against signature and reconciled daily; codes traceable to promoter
Inventory leakage	Daily count of promotional packs issued against consumers created

Genuine multi-family households exist, especially in older Lucknow properties. Address matches **flag for review, never auto-reject**, and support may approve a second offer at the same address on evidence of a separate household. **Build the review path before launch** — a rule with no appeal generates complaints you cannot answer.

8. Funnel and KPIs

#	Stage	Definition
1	Reach	Households exposed — leaflets delivered, standee footfall
2	QR scans	Unique scans by society short-link
3	Store visits	Play Store listing views
4	Installs	First opens
5	Registrations	OTP verified
6	Serviceable	Address inside the zone
7	Subscriptions started	Plan chosen
8	First delivery completed	Free pack 1 delivered
9	Promotional allocation complete	Both packs delivered
10	First wallet recharge	The gate that matters
11	First customer-funded delivery	Paid milk delivered
12–14	D7 / D14 / D30 active	Subscription live and funded
15	Referral conversion	Referred household's first paid delivery

Formulas

Scan → install	$\text{installs} \div \text{unique scans}$
Install → registration	$\text{registrations} \div \text{installs}$
Registration → subscription	$\text{subscriptions} \div \text{serviceable registrations}$
Subscription → recharge	$\text{first recharges} \div \text{subscriptions}$
Recharge → first paid	$\text{first paid deliveries} \div \text{first recharges}$
D7 / D14 / D30 retention	$\text{active \& funded at day N} \div \text{subscriptions started}$
Promo milk per activated sub	$\text{litres issued} \div \text{wallet-funded subscribers}$
Cost per wallet-funded sub	$\text{total campaign cost} \div \text{first recharges}$
Cost per D30 retained	$\text{total campaign cost} \div \text{D30 retained}$
Abuse rate	$\text{flagged or reversed redemptions} \div \text{total redemptions}$
Delivery success	$\text{delivered on time} \div \text{scheduled}$
Recharge failure	$\text{failed payment attempts} \div \text{attempts}$
Contribution per delivery	$(\text{litres} \times ₹4.70) + \text{basket margin} - ₹15$
LTV	$\text{monthly contribution} \times \text{expected months retained}$
Payback	$\text{cost per D30 retained} \div \text{monthly contribution}$

A download is not a customer. A registration is not a customer. A free delivery is not a customer. The campaign reports on **wallet-funded subscribers retained at day 30**, and on **litres per drop** — the number that decides whether any of it is worth doing.

9. Pilot design

Societies: 4 to 6, each with 150+ households, gated with an RWA to work through, within the existing geo-fence, on a single delivery route, mixed income. **Do not spread across the city** — twenty customers in one society is a route; twenty across Lucknow is twenty separate ₹15 drops.

Groups. Treatment: Option C. Control: Option B, in one comparable society. **Do not run more than one variable at a time**, and per the CRM specification do not run a formal split test until a single segment exceeds roughly 500 active customers — below that, differences are noise.

Duration: 6 weeks — 2 weeks of activation, 4 weeks of observation to reach a clean day-30 read.

Success thresholds — the campaign continues if:

	Threshold
Subscription → recharge	≥ 35%
D30 retained ÷ subscriptions started	≥ 40%
Litres per drop by week 4	≥ 2.0 and rising
Abuse rate	< 5%
Delivery success	≥ 97%

Stop-loss — halt and review if: delivery success falls below 90% in any week, abuse exceeds 10%, recharge conversion is under 20% after 200 subscriptions, or promotional stock cannot be reconciled to consumers created.

Cadence: a daily one-screen dashboard, a weekly review against thresholds, and a scale/revise/stop decision at week 6.

These thresholds are planning assumptions, not forecasts. There is no PYAAS data to base them on; they are set to be falsifiable, and the first fortnight replaces them with real numbers.

10. Responsibilities

Party	Owns
Lucknow Milk Union	Promotional FCM supply · confirming pack configuration, claim definition and reconciliation · BTL material if granted · quality standards for the app
PYAAS growth	Campaign design, creative, society selection, promoter management, dashboard
Society representatives / RWA	Permission for stalls and lift posters, WhatsApp group access
Promoters	Stall, demonstration, on-the-spot download and registration, promotional stock against signature
Hub staff	Receipt, batch and expiry monitoring, free-pack allocation, daily reconciliation
Delivery personnel	Proof of delivery for every promotional pack, exception reporting
Customer support	Recharge failures, address review, service recovery, escalation
Finance	Promotional stock in the books at nil invoiced cost with promotional value disclosed, wallet reconciliation, settlement
Technology	Offer engine, eligibility, fraud rules, analytics events, dashboard
Compliance	Disclosure copy, dark-pattern review, DLT and WhatsApp templates, consent register

Daily: promotional packs issued vs consumers created · exceptions · damaged or unused stock returned to the hub (never to the Sanstha — clause 04 forbids returns).

11. Required app changes

#	Change	Why
A-1	Offer engine: eligibility, one-per-number, one-per-address, state machine for pack 1 and pack 2	The mechanic
A-2	Offer terms screen shown before registration	Compliance — §16
A-3	Serviceability check at address entry, with a waitlist path if outside	Do not spend litres on households you cannot serve
A-4	Recharge screen with day-equivalents and equal-weight preset tiles	Conversion, and avoids Interface Interference
A-5	Wallet ledger split: refundable balance vs non-refundable promotional credit, shown as two lines	Matches /terms ; avoids a misleading balance
A-6	Pause, resume, quantity change and cancel — each reachable in two taps	Avoids the subscription-trap dark pattern
A-7	Delivery proof capture for promotional packs	Fraud control
A-8	Referral: reward released on the referred household's first paid delivery	Fraud control
A-9	Analytics events per §12	Measurement
A-10	Alternate-day plan presented at equal prominence	Route economics

12. Analytics events

```

campaign_qr_scanned      {society_id, asset_type, promoter_id}
app_installed            {install_source, campaign_id}
registration_started / registration_completed {method:"otp"}
serviceability_checked   {pincode, in_zone:bool}
offer_terms_viewed       {offer_id, dwell_ms}
subscription_created      {plan, sku, qty_ml, frequency, start_date}
promo_pack_allocated      {pack_no:1|2, trigger:"subscription"|"recharge"}
delivery_completed        {order_id, promo_pack:bool, on_time:bool}
wallet_recharge_initiated / _succeeded / _failed {amount, method, failure_reason}
promo_pack_delivered      {pack_no, proof_type}
basket_item_added         {sku, source:"nudge"|"organic"}
subscription_paused / _resumed / _cancelled      {reason_code}
referral_sent / referral_converted              {referrer_id}
abuse_flag_raised         {rule, entity}

```

No UPI handle, no VPA, no account number, no full address in any analytics payload.

13. Dashboard

One screen, updated daily. Top row: the funnel, absolute numbers, yesterday and cumulative. Second row: the four conversion rates that matter — scan→install, registration→subscription, **subscription→recharge**, D30 retention. Third row: **litres per drop**, basket attach rate, delivery success. Fourth: abuse flags, recharge failures, open complaints, promotional stock reconciliation. Alerts fire on any stop-loss breach.

14. Financial model

Delivered separately as an editable spreadsheet — `PYAAS_Campaign_Financial_Model.xlsx` — with every assumption on its own labelled sheet.

Two things the model does deliberately. It carries the promotional milk at **₹0 invoiced cost and ₹72 promotional value** on separate lines, so the campaign's true cost and its true value to the customer are both visible. And it computes **contribution per delivery**, which is where the pilot's real answer lives: at ₹4.70 per litre against a ₹15 drop, contribution is negative until roughly 3.19 litres per delivery.

15. Campaign copy

15.1 Name and tagline

पहला लीटर हमारी ओर से · *Your first litre is on us*

15.2 Lift poster / standee

हिन्दी

पराग का दूध — अब सीधे आपके दरवाजे तक

पहला लीटर हमारी ओर से

PYAAS ऐप डाउनलोड कीजिए · सब्सक्रिप्शन शुरू कीजिए
पहली सुबह 500 मि.ली. फुल क्रीम दूध मुफ्त
वॉलेट में ₹500 डालिए — दूसरा 500 मि.ली. पैक भी मुफ्त

रोज़ सुबह 7 बजे तक · कभी भी रोकें, बदलें या बंद करें
हर पैक पर QR — देखिए दूध किस फार्म से आया

[QR] Google Play पर PYAAS (Android)
एक घर एक बार · केवल चुनिंदा क्षेत्रों में · स्टॉक रहने तक
दूध पराग का · डिलीवरी और ऐप PYAAS का

English

Parag milk, now at your door

Your first litre is on us

Download the PYAAS app · start a subscription

500 ml Full Cream free on your first morning

Add ₹500 to your wallet – the second 500 ml pack is free too

By 7 am daily · pause, change or cancel any time

QR on every pack – see which farm your milk came from

[QR] PYAAS on Google Play (Android)

One per household · selected areas only · while stocks last

Milk by Parag · delivery and app by PYAAS

15.3 Door hanger

कल सुबह 7 बजे – आपके दरवाजे पर पराग का दूध।

पहली सुबह 500 मि.ली. फुल क्रीम मुफ्त।

₹500 का पहला रिचार्ज – दूसरा पैक भी मुफ्त।

ऐप डाउनलोड कीजिए, पिन कोड डालिए, प्लान चुनिए।

बस इतना ही। [QR]

15.4 Society WhatsApp message

नमस्ते 🙏 [सोसाइटी का नाम] के निवासियों के लिए –

PYAAS अब आपकी सोसाइटी में पराग का दूध रोज सुबह 7 बजे तक पहुँचा रहा है।

- पहली सुबह 500 मि.ली. फुल क्रीम दूध मुफ्त
- ₹500 का पहला वॉलेट रिचार्ज करने पर दूसरा 500 मि.ली. पैक भी मुफ्त
- कभी भी रोकें या बंद करें – कोई शर्त नहीं
- हर पैक पर QR – दूध किस फार्म से आया, ऐप में देखिए

एक घर एक बार। हमारे डिलीवरी क्षेत्र में ही उपलब्ध।

ऐप: [लिंक] सवाल? 99996 80081

दूध पराग का है; डिलीवरी, ऐप और वॉलेट PYAAS का।

15.5 Promoter pitch — 30 seconds

"नमस्ते! मैं PYAAS से हूँ — हम पराग का दूध रोज़ सुबह 7 बजे तक घर पहुँचाते हैं।

अभी ऐप डाउनलोड कीजिए और सब्सक्रिप्शन शुरू कीजिए तो कल सुबह 500 मि.ली. फुल क्रीम दूध बिल्कुल मुफ्त। कोई पैसा अभी नहीं।

अगर दूध पसंद आए तो वॉलेट में ₹500 डाल दीजिएगा — लगभग आठ दिन का दूध — और दूसरा 500 मि.ली. पैक भी मुफ्त मिल जाएगा।

पसंद न आए तो कोई बात नहीं, बंद कर दीजिए। कोई शर्त नहीं।

पैक पर QR है — स्कैन कीजिए, दूध किस फार्म से आया, कब पैक हुआ, सब दिख जाएगा।"

The promoter must say "कोई पैसा अभी नहीं" and "कोई शर्त नहीं" out loud. The single biggest objection at the door is fear of a trap.

15.6 App landing screen

पहला लीटर हमारी ओर से

- ✓ पहली सुबह — 500 मि.ली. फुल क्रीम दूध मुफ्त
- ✓ ₹500 का पहला रिचार्ज — दूसरा 500 मि.ली. पैक मुफ्त

आपको क्या करना है:

1. मोबाइल नंबर से रजिस्टर कीजिए
2. पता डालिए — हम देखेंगे कि आपका क्षेत्र कवर है या नहीं
3. दूध और मात्रा चुनिए, प्लान शुरू कीजिए

पहली डिलीवरी के लिए कोई भुगतान नहीं।
जारी रखने के लिए वॉलेट रिचार्ज ज़रूरी है।

एक घर एक बार • चुनिंदा क्षेत्र • स्टॉक रहने तक
[शर्तें देखें] [शुरू कीजिए]

15.7 Offer terms summary — shown before registration

कौन ले सकता है: हमारे डिलीवरी क्षेत्र में रहने वाले नए ग्राहक।
क्या मुफ्त है: पराग फुल क्रीम दूध, 500 मि.ली. × 2 पैक (कुल 1 लीटर)।
पहला पैक: सब्सक्रिप्शन शुरू करने पर, पहली डिलीवरी के साथ।
दूसरा पैक: ₹500 या उससे अधिक का पहला वॉलेट रिचार्ज करने पर,
अगली डिलीवरी के साथ। 7 दिन के भीतर।
सब्सक्रिप्शन: ज़रूरी है। कोई न्यूनतम अवधि नहीं — कभी भी बंद करें।
वॉलेट: दूसरे पैक के लिए रिचार्ज ज़रूरी है। वॉलेट की शर्तें [लिंक] पर।
सीमा: एक मोबाइल नंबर और एक पते पर एक बार।
क्षेत्र: केवल हमारे मौजूदा डिलीवरी क्षेत्र में।
अवधि: [तिथि] से [तिथि] तक, स्टॉक रहने तक।
MRP: दूध की MRP में कोई बदलाव नहीं। यह छूट नहीं, अतिरिक्त मात्रा है।
सहायता: 99996 80081

Every material condition is here, before the customer invests any effort. Nothing in fine print.

15.8 Transactional messages

Subscription confirmed

सब्सक्रिप्शन शुरू  कल सुबह 7 बजे तक आपका पहला पैक — 500 मि.ली. पराग फुल क्रीम, मुफ्त। कोई भुगतान नहीं। कभी भी रोकें या बदलें।

First delivery, 07:30

आपका दूध पहुँच गया  पैक पर QR स्कैन कीजिए — फार्म, समय और गुणवत्ता जाँचें, सब ऐप में।

Recharge prompt, 10:30 on delivery day

कल भी दूध चाहिए? आज 12 बजे तक वॉलेट रिचार्ज कीजिए। ₹500 डालिए — लगभग 8 सुबह का दूध — और आपका दूसरा 500 मि.ली. मुफ्त पैक कल की डिलीवरी के साथ। [\[लिंक\]](#)

Low balance

वॉलेट में लगभग [n] दिन का बैलेंस बचा है। कल 12 बजे तक रिचार्ज कर दीजिए ताकि सुबह की डिलीवरी न रुके। [\[लिंक\]](#)

Day 7

एक हफ्ता पूरा 🎉 आपकी [n] सुबह की डिलीवरी समय पर पहुँची। छुट्टी पर जा रहे हैं? ऐप में एक टैप में रोक दीजिए।

Referral

पड़ोसी को बताइए — उन्हें भी पहली सुबह 500 मि.ली. फुल क्रीम मुफ्त। उनकी पहली भुगतान वाली डिलीवरी के बाद आपके वॉलेट में ₹[X] Pyaas क्रेडिट (ऑर्डर पर इस्तेमाल, नकद वापसी नहीं)।

Service recovery

आज आपकी डिलीवरी में कमी रह गई — हमें खेद है। [\[कारण\]](#)। [\[समाधान\]](#)। ऐसा दोबारा न हो, यह हम देख रहे हैं।

Win-back — only after the 90-day opt-out bar has cleared

आपकी सुबह की डिलीवरी बंद है। कोई दिक्कत हुई हो तो बताइए — हम ठीक करेंगे। दोबारा शुरू करना हो तो ऐप में एक टैप। [\[लिंक\]](#)

16. Compliance checklist

The CCPA is actively enforcing dark patterns. Guidelines notified 30 November 2023; advisory 5 June 2025; enforcement action announced 3 June 2026 against companies including PhysicsWallah (₹5 lakh) and McAfee (₹1 lakh), with **₹20 lakh in total penalties across nine companies reported to Parliament on 6 August 2026 — a fortnight ago.** Five patterns were named in that action: **Basket**

Sneaking, Confirm Shaming, Forced Action, Interface Interference and Trick Question.

Thirteen are listed in the Guidelines.

Risk	Requirement in this campaign
Bait and switch	The advertised free litre must be honoured exactly as stated. If LMU supplies a different pack configuration, change the creative before launch, not the promise after
Drip pricing	The ₹500 recharge condition appears on the poster, the landing screen and the terms — never revealed only after registration
Forced action	Collect only mobile, OTP and address. Everything else optional
Subscription trap	No minimum term. Cancel in two taps. No auto-renewal without express consent
Interface interference	Recharge tiles at equal visual weight; the decline path as clear as the accept
Confirm shaming	Never phrase a decline as neglect of one's family
False urgency	"While stocks last" only if true. No invented countdowns — the noon cut-off is real and may be stated
Basket sneaking	Nothing pre-added to a subscription. Basket nudges are separate, opt-in messages
MRP	Clause 18 — no change to MRP. Describe as additional quantity, never as a discount
Brand separation	Parag makes the milk; PYAAS delivers it. Never imply PYAAS manufactures. Your application of 06.08.2026 undertook prior approval for use of the Parag identity — honour it
Wallet disclosure	Refund on closure is net of amounts due and non-refundable promotional credits. The app must say what the terms say
SMS / WhatsApp consent	DLT-registered PYAAS-only header with the correct category suffix; explicit opt-in for promotional; DND scrub; 10 am–9 pm; 90-day bar after any opt-out
Privacy	Consent captured with timestamp, source and scope. Correct the Play Data Safety declaration before this campaign launches — it currently states no data is shared with third parties while the privacy policy says otherwise
Referral disclosure	State that the reward is non-refundable promotional credit and when it is released
GST / accounting	Milk is exempt. Promotional stock enters at nil invoiced cost with promotional value disclosed separately
FSSAI / product claims	Describe the milk only as Parag's specification states. No A2, breed, origin or health claim anywhere — the claims freeze applies to every asset in this campaign

17. Launch-readiness checklist

Blocking

- [] **Pack configuration confirmed in writing** — 2 × 500 ml, or otherwise
- [] **"Consumer created" defined in writing**, with the claim and reconciliation process
- [] **Website app link live** — W-19; the QR must land somewhere that works
- [] **Play Data Safety declaration corrected**

- [] Offer terms screen live in the app, before registration
- [] Wallet ledger split — refundable vs promotional credit — live in the app
- [] Eligibility and one-per-household rules live, with a review path
- [] DLT header registered and templates approved
- [] Promotional stock receipt, storage and reconciliation process running at the hub
- [] Support number staffed in the published hours

Before printing

- [] Every asset carries: who is eligible, what is free, exact quantity and packs, subscription required, recharge required for the second pack, offer period, area limits, one per household, cancellation, stock availability, support number
- [] Brand separation line on every asset
- [] No A2, breed or origin claim in any asset
- [] QR short-links unique per society
- [] Android-only stated honestly

18. Risks, assumptions and open questions

Risks

Risk	Mitigation
Unit economics negative at typical volumes	Society-level density, alternate-day plans, basket attachment. Judge the pilot on litres per drop
Pack configuration differs from assumption	Confirm before printing; Option B is the fallback
Free-litre allowance capped or withdrawn	Ask; do not build a campaign that cannot survive its withdrawal
Single insulated vehicle, no contractual fallback (clause 21)	Contract a backup before the campaign creates daily obligations
Prepaid, no returns (clauses 04, 12)	Small indents, daily reforecast, FEFO enforced in software
Website still says "launching soon"	W-19 before print
Promoter-driven false signups	Stock against signature, promoter-level free-to-cancel tracking

Assumptions requiring confirmation: 2 × 500 ml pack configuration · "consumer created" = first subscription · no cap on total litres · promotional stock claimable as market-development stock · rate-list MRPs (OCR'd scan) · ₹15 delivery drop · base distributor rate on products, which the work order does not state.

Open questions for LMU — put in the same channel as the reply of 20 August:

1. **How is the free litre supplied — 2 × 500 ml, 1 × 1 L, or 450 ml packs?**
2. **What constitutes a "consumer created", and how is the litre claimed and reconciled?**
3. Is there a cap on total promotional litres over the POC?
4. Does the allowance continue beyond the three-month period?
5. Will the Sanstha provide BTL material, as sought at point 5? (*Unanswered since 7 August*)
6. Is prior approval required for creative using the Parag identity, and from whom?
7. May a standee be placed at Parag parlours?

Entitlement quoted from the handwritten insertion at clause 04 of Work Order 5347 dated 13.08.2026, read at 400 dpi. All other clause references are to the same work order. Prices from the Parag rate list, corroborated against clauses 01 and 02; the rate list is an OCR'd scan and figures should be confirmed before publication. Regulatory positions should be confirmed with counsel before the business relies on them.
