

PYAAS DAIRY · KNOW YOUR MILK

CRM, Retention & AI-Calling Playbook

Trigger-based SMS · RCS · WhatsApp · Push · AI outbound calling — for Quick Pyas (on-demand) and Morning Delivery (subscription)

Trust first · Service before selling · Fewer, better messages · TRAI/DLT & DPDP compliant

How to read this playbook

Every message and call is trigger-based — it fires only when something real happens in the customer's journey. Order, wallet and delivery updates are treated as service/transactional (allowed 24×7). Offers and win-backs are promotional (10 am–9 pm only, opt-in required). The goal is reliability and retention, not notification volume. Prepared for Pyas leadership · 11 August 2026 · working prototype.

1. Guiding principles & customer segments

1.1 Six principles

- **Service before selling.** 80% of messages are useful updates (order, wallet, delivery); promotions are rare and always opt-in.
- **Fewer, better, timely.** One message per real event. Hard frequency caps. Silence is a feature.
- **Right channel for the job.** Critical/wallet → SMS; conversational → WhatsApp; live tracking → RCS/Push; high-value recovery → AI call.
- **Respect consent & quiet hours.** Opt-in on the DLT consent register + WhatsApp opt-in; easy STOP; promo & calls only 10 am–9 pm (calls we cap at 8 pm).
- **Recover, don't chase.** When something goes wrong, apologise and fix fast; when a wallet is low, help — never threaten to cut off a Founding Family on one low balance.
- **Escalate people problems to people.** Anger, quality/safety, refund or payment disputes, legal → human agent immediately; AI never handles these.

1.2 Customer segments (the base for every trigger)

Segment	Definition	Primary intent
New	Registered ≤ 7 days, 0–1 orders	Activate: first order / first subscription
Active	Ordering / receiving normally	Deepen basket; keep wallet healthy
High-value	Subscription + basket/ghee, or high AOV/frequency	Protect fiercely; AI-call priority; referral
Subscription	On a recurring Morning Delivery plan	Retention, wallet, renewal
At-risk	Reduced qty, long pause, low engagement, wallet lapses	Reactivate before churn
Inactive	No order 30 d (QP) / paused >7 d (MD)	Win-back
Complaint	Open issue / low rating	Service recovery; hold all promo

2. Channel strategy & controls

2.1 Which channel, and why

Channel	Use it for	Why	Compliance note
SMS	OTP, wallet-critical, delivery-critical, payment failure, fallback when app/WhatsApp unread	Highest reach & deliverability; works on any phone; trusted for money/OTP	DLT header + pre-approved template; service/txn = 24x7; promo 10a–9p; whitelist URLs
RCS	Branded order tracking, rich delivery cards, verified sender where supported	Rich, branded, read-receipts; upgrades SMS on supported Android	Verified RBM agent; falls back to SMS; same category rules
WhatsApp	Primary conversational channel: onboarding, updates, gentle nudges, feedback, support	2-way, familiar, media-rich; utility templates deliver reliably	Opt-in required; Meta template categories (Utility/Auth/Marketing); 24-h service window for free-form
Push	Real-time nudges to app users: cart, out-for-delivery, delivered	Free, instant, in-context	App permission; silent for non-app users → fall back to WA/SMS
Email	Receipts, monthly wallet/consumption statement, low-urgency info	Cheap, good for records; low urgency	Unsubscribe link; not for time-critical
AI call	High-value recovery only: activation, payment/renewal, churn, post-complaint	Human-like, resolves fast, best for money & saves	Commercial-call consent; 10a–8p; DND scrub; identify + purpose + opt-out; humans for disputes

2.2 Consent, opt-out & language

- **Opt-in at onboarding:** capture DLT-registered consent + WhatsApp opt-in + call consent in the app during sign-up; log time, source, scope on the consent register.
- **Opt-out always:** “Reply STOP / बंद करें” on SMS/WhatsApp; “Do not call” honoured instantly; opt-out never affects essential service (delivery/wallet) messages.
- **Language:** capture Hindi/English preference at sign-up; default to Hinglish for warmth; senior accounts default to Hindi + larger flow.

2.3 Frequency caps, quiet hours & de-duplication

Control	Rule
Promotional cap	≤ 1 promo message/day, ≤ 3 promo/week per customer, across ALL channels combined
Service/transactional	As needed per real event (order, wallet, delivery) — but never > 6 identical/hour or the day feels spammy
Quiet hours	Promotional SMS/WhatsApp/RCS: 10 am–9 pm only. AI & tele calls: 10 am–8 pm. Critical wallet/OTP/delivery: allowed anytime but avoid 10 pm–7 am unless truly urgent
De-duplication	One message per event. Priority order Push → WhatsApp → SMS: if Push/WhatsApp is delivered & read within the window, suppress the SMS. Never send the same content on two channels within 30 min
AI-call gate	Only after messaging has been tried (except payment-failure/complaint), only high-value/high-intent, max 2 attempts, respect DND & opt-out

A. New-customer activation

Objective: turn a registration into a first paid order (Quick Pyaas) or an active daily subscription (Morning Delivery). Warm, helpful, low-pressure.

Trigger / situation	Segment	Channel	When it triggers	Objective	Message content (EN · Hinglish)	Call-to-action	Freq. cap	Success metric
Registered, no first order	New (both)	Push → WhatsApp → SMS	2 h after sign-up (Push/WA); SMS next morning if unread	Get the first order	EN: "Welcome to Pyaas! Fresh milk is 2 taps away — recharge your Wallet & place your first order. Help: 96672 60050." · HI: "Pyaas mein swagat! Pehla order 2 tap mein — Wallet recharge karein. Madad: 96672 60050."	Open app / order	1/day, max 3 in 5 days	First-order conversion %
First Quick Pyaas order completed	New→Active	WhatsApp / SMS	On delivery	Confirm, thank, seed repeat	EN: "Delivered! Thanks for trying Pyaas 🙌 Reorder anytime in the app." · HI: "Deliver ho gaya! Pyaas try karne ke liye dhanyavaad. Dobra order kabhi bhi app par."	Reorder	1 per order	2nd-order rate within 14 d
Morning Delivery subscription started	New→Subscription	WhatsApp	At activation	Reassure, set expectations	EN: "Your morning milk starts [date], delivered by 7 am. Pause/resume anytime. Keep your Wallet topped up so it never stops." · HI: "Aapki subah ki milk [date] se, 7 baje tak. Kabhi bhi Pause/Resume. Wallet recharge rakhein."	—	1 at start	Day-1 delivery success; D7 retention
Cart added, checkout abandoned	New/Active	Push → WhatsApp	30–60 min after abandon	Recover the order	EN: "Your Pyaas basket is waiting 🛒 Finish your order in 1 tap." · HI: "Aapka Pyaas basket taiyaar hai — 1 tap mein order poora karein."	Complete order	1 (2nd only if high-value → AI call)	Cart-recovery %
Subscription selected, not paid	New	WhatsApp → SMS	2 h, then next morning	Complete Wallet recharge & start	EN: "One step left — recharge your Wallet to start tomorrow's delivery." · HI: "Bas ek kadam — Wallet recharge karein aur kal se delivery shuru."	Recharge	2 total → then AI call if high-value	Activation %
Inactive after registration (no order 72 h)	New	WhatsApp → Call	Day 3 (WA); Day 5 AI call if high-intent	Reactivate / assist setup	EN: "Need help placing your first order? Reply here or call 96672 60050 — we'll set it up in 2 minutes." · HI: "Pehla order mein madad chahiye? Yahin reply karein ya 96672 60050 par call."	Get help / order	1 WA + 1 AI call	Activation % by Day 7

B. Wallet recharge & payment recovery

The Pyas Wallet is prepaid, so a healthy balance = a delivery that never fails. These are service messages (allowed anytime), kept calm and helpful — money messages must build trust, not anxiety.

Trigger / situation	Segment	Channel	When it triggers	Objective	Message content (EN · Hinglish)	Call-to-action	Freq. cap	Success metric
Low balance before next cycle (< 3 days cover)	Subscription	WhatsApp + Push	Morning, T-2 days	Nudge recharge early	EN: "Your Wallet is running low. Recharge to keep your morning milk coming." · HI: "Wallet kam hai. Recharge karein taaki subah ki milk na ruke."	Recharge	1	Recharge completion %
Insufficient for tomorrow (at cut-off)	Subscription	SMS + WhatsApp	Evening before cut-off	Prevent a missed delivery	EN: "Low balance — recharge by [cut-off] to receive tomorrow's delivery." · HI: "Balance kam — [cut-off] tak recharge karein taaki kal delivery mile."	Recharge (1-tap)	1 (critical)	Save rate (delivery retained)
Failed recharge / payment	All	SMS + WhatsApp	Immediately on failure	Help complete payment	EN: "Your recharge didn't go through. Try again or use another method — no money was deducted." · HI: "Recharge nahi hua. Dobara try karein — paise nahi kate."	Retry	1 + retry link	Recovery %
Subscription renewal due	Subscription	WhatsApp	T-2 days	Keep the plan going	EN: "Your monthly plan renews on [date]. Keep your Wallet topped up — nothing else to do." · HI: "Aapka monthly plan [date] ko renew. Bas Wallet recharge rakhein."	Recharge	1	Renewal %
Not recharged despite reminders	Subscription (high-value first)	Call	After 2 service reminders (T-1 + morning)	Recover before pausing	AI call — see F3/F4. Warm, offer one-tap recharge link on WhatsApp; confirm if they want to pause instead.	Recharge / decide	1 AI call, then pause	Save rate; graceful-pause %
Refund / credit / promo added to wallet	All	SMS / WhatsApp	Immediately on credit	Build trust / delight	EN: "₹[X] added to your Pyas Wallet as [reason]. It's ready for your next order." · HI: "₹[X] aapke Pyas Wallet mein [reason] ke liye jama. Agle order ke liye taiyaar."	—	1 per credit	Trust; next-order uplift

Wallet reminder schedule, escalation & the cut-off rule

T-2 days (low balance): gentle WhatsApp/Push (service). **T-1 evening (before cut-off):** SMS + WhatsApp — the critical save. **Morning of shortfall:** for a Founding Family, still deliver within a capped grace and flag; for others, "delivery on hold — recharge to resume."

Escalation: after 2 service reminders with no recharge → 1 AI call (high-value first). **Maximum before pausing service:** 3 messages + 1 AI call over ~48–72 h. Then pause the subscription (not cancel) and move to win-back. Never abruptly cut off a Founding Family on a single low balance — recover the relationship first, the rupee second.

C. Retention & reactivation

Catch drift early. Reduced quantity, a long pause, or gone-quiet are churn signals — respond with help and a light check-in, not a discount blast.

Trigger / situation	Segment	Channel	When it triggers	Objective	Message content (EN · Hinglish)	Call-to-action	Freq. cap	Success metric
Quick Pyas — no order 7 days	Active→At-risk	WhatsApp	Day 7	Soft re-engage	EN: "Miss your Pyas? Fresh milk & essentials, delivered in minutes." · HI: "Pyas yaad aa rahi hai? Taaza doodh & essentials, minute mein."	Order	1	7-day reactivation %
Quick Pyas — no order 14 / 30 days	At-risk / Inactive	WhatsApp → Call	Day 14 (offer, opt-in); Day 30 AI win-back if high-value	Win back	EN: "We'd love you back — here's ₹[X] in your Wallet for your next order (valid [n] days)." · HI: "Wapas aaiye — agle order par Wallet mein ₹[X] (valid [n] din)."	Order	1 promo (10a–9p)	Win-back %
Morning Delivery — quantity reduced / paused / churn signs	Subscription→At-risk	WhatsApp → Call	On the event; AI call if high-value or pause >7 d	Understand & retain	EN: "We noticed a change. Everything okay with your deliveries? Reply here or we can call." · HI: "Humein change dikha. Delivery theek chal rahi hai? Reply karein ya hum call karein."	Reply / keep plan	1 WA + 1 AI call	Churn saved %
Subscription nearing renewal	Subscription	WhatsApp	T-2 days	Smooth renewal	See B (renewal due). Keep it a service reminder, not a sell.	Recharge	1	Renewal %
Stopped opening messages	Any	SMS / Call	After 3 unread WA in 14 d	Re-permission / switch channel	EN: "We'll go quiet unless you need us. Reply YES to keep updates, or call 96672 60050." · HI: "Hum kam message bhejenge. Updates chahiye to YES bhejin."	Reply YES	1	Re-engagement %; opt-out %
High-value customer inactive	High-value	Call	Day 10 inactive (MD) / Day 21 (QP)	Personal save	AI call — see F5. Warm check-in, no pressure, small goodwill only if warranted.	Reactivate	1 AI call	High-value retention %
Poor experience, but no complaint	Any	WhatsApp	Within 12 h of a detected miss/late	Proactive recovery	EN: "Sorry if yesterday's delivery wasn't perfect. Did everything arrive okay? We'll fix anything." · HI: "Kal ki delivery mein kami ho to maaf kijiye. Sab theek mila? Hum sudhaar denge."	Reply / rate	1	Silent-churn prevented; rating uplift

D. Service & operational updates

Informative, never promotional. Sent only when genuinely required. Category: transactional/service (24x7 allowed). Primary channel Push/WhatsApp; SMS/RCS fallback for critical ones.

Trigger / situation	Segment	Channel	When it triggers	Objective	Message content (EN · Hinglish)	Call-to-action	Freq. cap	Success metric
Order confirmed	All	Push / WhatsApp	On order	Confirm	EN: "Order confirmed  [items]. Arriving [ETA/tomorrow AM]." · HI: "Order confirm  [items]. [ETA/kal subah] tak."	Track	1/order	On-time expectation set
Packed / out for delivery	Quick Pyaas	Push / RCS	On dispatch	Live status	EN: "Out for delivery — [partner]. ETA [x] min · ETA [x] min." · HI: "Delivery ke liye nikla — ETA [x] min."	Track live	1/order	Track-open %
Delivery delayed	All	Push + WhatsApp	As soon as known	Set honest expectation	EN: "Running a little late — new ETA [x]. Sorry for the wait." · HI: "Thodi der ho rahi hai — naya ETA [x]. Kshama karein."	Track	1/event	Complaint avoidance
Product substitution needed	Quick Pyaas	WhatsApp / Push	Before packing	Get approval	EN: "[Item] is out — okay to swap for [alt] (similar price)? Reply YES/NO." · HI: "[Item] nahi hai — [alt] chalega? YES/NO bhejin."	Approve	1	Substitution accept %
Item unavailable	Quick Pyaas	WhatsApp + SMS	Before delivery	Refund clearly	EN: "[Item] is unavailable; ₹[x] refunded to your Wallet. Sorry!" · HI: "[Item] uplabdh nahi; ₹[x] Wallet mein wapas. Maaf kijiye."	—	1	Refund clarity; CSAT
Delivery completed	All	Push / WhatsApp	On delivery	Confirm + log	EN: "Delivered  Enjoy! Tap to rate." · HI: "Deliver ho gaya  Rate karein."	Rate	1/order	Delivery-confirm read %
Morning delivery skipped (payment / pause / disruption)	Subscription	SMS + WhatsApp	By 7 am on the day	Explain + path to resume	EN: "No delivery today — [reason: low Wallet / your pause / area issue]. [Recharge to resume / Resumes [date]]." · HI: "Aaj delivery nahi — [karan]. [Recharge karein / [date] se shuru]."	Recharge / resume	1/event	Same-day resume %
Route / service-area change	Affected area	WhatsApp + SMS	≥ 2 days before	Inform clearly	EN: "Your delivery time/area is changing from [date] to [new]. Questions? 96672 60050." · HI: "Aapki delivery [date] se [new] ho jaayegi. Sawaal? 96672 60050."	Acknowledge	1 + reminder	Complaints avoided

E. Feedback, complaint recovery & trust

Recovery is where trust is won or lost. Acknowledge fast, fix faster, and route people problems to people.

Trigger / situation	Segment	Channel	When it triggers	Objective	Message content (EN · Hinglish)	Call-to-action	Freq. cap	Success metric
Low rating (≤ 3★)	Any	WhatsApp → Call	Within 1 h	Understand & fix	EN: "Sorry we missed the mark. What went wrong? We'll make it right." · HI: "Kami ke liye maaf kijiye. Kya hua? Hum theek karenge." · AI call for high-value.	Tell us / accept fix	1 WA + (AI/human) call	Recovery %; rating change
Complaint raised	Any	WhatsApp	Acknowledge < 2 h	Own it	EN: "Got it — we're on it. You'll hear back within [24 h] with a fix." · HI: "Mil gaya — hum dekh rahe hain. [24 ghante] mein samadhan."	—	As needed	< 24 h resolution %
Delivery late	Any	WhatsApp	On detection	Apologise + option	EN: "Sorry today's milk was late. We've credited ₹[x] as an apology." · HI: "Aaj milk late hui, maaf kijiye. ₹[x] credit kiya."	—	1	CSAT; repeat retained
Wrong / damaged / missing product	Any	WhatsApp + Call	On report	Instant make-good	EN: "Sorry! We'll redeliver [item] or refund ₹[x] to your Wallet — your choice." · HI: "Maaf kijiye! [item] dobara bhejin ya ₹[x] Wallet mein — aap batayein."	Choose fix	1	Make-good time; CSAT
Milk QUALITY / safety concern	Any	Call (HUMAN)	Immediately	Safety first	HUMAN agent only — never AI. Apologise, collect batch/photo, stop that batch, refund/replace, log for recall SOP. "Your family's safety comes first — we're acting now."	Human handles	Immediate	Safety SLA; zero repeat
Complaint resolved	Any	WhatsApp	On resolution	Close the loop	EN: "Fixed ✅ Thanks for your patience. Anything else? We're here." · HI: "Theek ho gaya ✅ Dhanyavaad. Aur kuch? Hum yahin hain."	Rate	1	Reopen %; post-fix CSAT
High rating / positive feedback	Happy	WhatsApp	After a strong experience	Thank + referral	EN: "Thank you! 🙌 Love Pyaas? Refer a neighbour — you both get Wallet credit after their first order." · HI: "Dhanyavaad! Pyaas pasand aayi? Padosi ko refer karein — dono ko Wallet credit."	Refer	1	Referral rate

AI vs human, and resolution SLAs

AI agent may handle: a single late/missed delivery, reorder help, wallet recharge, feedback capture, routine make-good within authority. **Escalate to a HUMAN immediately for:** anger/abuse, any milk quality or safety concern, refund or payment disputes, legal/regulatory issues, repeated failed deliveries (≥2), or anything the AI cannot resolve.

Resolution SLAs: acknowledge < 2 h · routine resolve < 24 h · quality/safety = immediate (stop batch, human call same hour). Every complaint holds all promotional messages until closed.

F. AI outbound-call strategy

AI calls are reserved for high-value, high-intent moments where a short human-like conversation beats a message. Every call identifies Pyaas, states its purpose, asks consent to continue, stays brief and helpful, and lets the customer opt out or reach a human instantly.

Call trigger	Eligibility rule	Best time	Objective	AI script / flow (short)	Offer / resolution authority	Transfer to human when	Do-not-call rule	Success metric
First-order activation	Registered ≤5 d, no order, high-intent (browsed/added), not DND-blocked	11a–1p or 5–7p	Help place first order	Greet+identify → consent → "kya first order set karein? 2 min lagenge." → guide to Wallet+order → confirm	One-time welcome ₹[X] wallet credit (capped)	Confusion beyond 2 tries; complaint	No repeat within 7 d; opt-out honoured	First-order conversion %
Cart abandonment (high basket)	Basket ≥ ₹[300], abandoned >2 h, opted-in	Within 3 h, 11a–8p	Recover the basket	Identify+consent → "aapka basket ₹[X] ka ready hai, complete karein?" → resolve blocker → checkout	Free delivery on this order only	Payment/app fault; annoyance	Once only; if no answer, drop to WhatsApp	Recovered-basket %
Wallet recharge (Morning Delivery)	2 service reminders unheeded, subscription active	5–8 p (before next AM)	Keep tomorrow's delivery	Identify+consent → "kal delivery jaari rakhne ke liye Wallet recharge — link bhej dun?" → send link → confirm	Send 1-tap recharge link; offer pause if preferred	Payment dispute; wants to cancel angrily	Max 1/cycle; DND scrub	Save rate
Payment failure / renewal recovery	Failed payment or renewal lapse, was active	10a–8p, next day	Recover payment/renewal	Identify+consent → explain gently, no money lost → offer retry link / alt method → confirm	Retry link; small grace extension	Any payment/refund dispute → human	2 attempts max, 24 h apart	Recovery %
Churn-risk / inactive high-value	High-value, MD paused >7 d or QP inactive 21 d	12–2p or 6–8p	Personal save	Identify+consent → "sab theek? koi dikkat to nahi?" → listen → fix/resume → thank	Goodwill credit only if warranted	Complaint surfaces; anger	1 call; then rest 30 d	Reactivation %
Post-complaint recovery	Complaint resolved for a valued customer	Next day, 11a–7p	Confirm satisfaction, rebuild trust	Identify+consent → "aapki dikkat solve hui — sab theek hai?" → confirm → small goodwill	Apology credit within authority	Still unhappy; new issue	1 call; not if opted out	Reopen %; CSAT
Feedback after poor experience	Rated ≤3★ or flagged miss, high-value	Next day, 11a–7p	Learn & recover	Identify+consent → "kal theek nahi raha, kya hua batayein?" → capture → assure fix	Make-good within authority	Anger/quality/safety → human	1 call; opt-out honoured	Recovery %; insight logged
Win-back — recently cancelled	Cancelled ≤30 d, was subscription	12–2p or 6–8p	Bring them back	Identify+consent → "aapko wapas dekhkar khushi hogi — kya rok raha tha?" → address → re-subscribe	Restart offer (capped), founder pricing if eligible	Grievance about why they left → human	1 call; then no-call 60 d	Win-back %
Referral request	CSAT high / rated 5★ recently, opted-in	12–2p or 6–8p	Ask for a warm referral	Identify+consent → thank → "kya kisi padosi ko batana chahenge? dono ko Wallet credit."	Referral credit both sides after friend's 1st paid order	Any dissatisfaction surfaces	Only to happy, opted-in; 1/quarter	Referrals generated

AI-call guardrails (every call, no exceptions)

1) Identify Pyaas + purpose in the first 10 seconds. 2) Ask consent to continue; if "no", thank and end. 3) Stay under ~90 seconds; be helpful, never pushy; make no misleading promise. 4) Offer easy opt-out ("aap kabhi bhi mana kar sakte hain") and a one-line path to a human. 5) Transfer immediately on anger, quality/safety, refund/payment/legal disputes, or repeated failures. 6) Respect DND, quiet hours (10a–8p) and per-trigger call caps. 7) Record consent & outcome for audit.

G. Ready-to-use scripts (English + Hinglish)

G.1 SMS / RCS templates (register on DLT before use)

#	Template (fill [])
Welcome / first order	Pyas: Welcome! Recharge your Wallet & place your first order in 2 taps. Help 96672 60050. Reply STOP to opt out. — परागPyas
Wallet low (T-1)	Pyas: Low Wallet balance. Recharge by [cutoff] to receive tomorrow's milk: [link]. — Service
Payment failed	Pyas: Your recharge didn't complete; no money was deducted. Retry: [link]. Help 96672 60050.
Delivery skipped	Pyas: No delivery today ([reason]). [Recharge to resume: link / Resumes [date]]. Sorry for the inconvenience.
Refund/credit	Pyas: ₹[X] added to your Wallet ([reason]). Ready for your next order.
Win-back (promo, 10a-9p, opt-in)	Pyas: We'd love you back — ₹[X] in your Wallet for your next order, valid [n] days: [link]. STOP to opt out.

G.2 WhatsApp (utility templates — warmer, Hinglish)

- **Onboarding:** “नमस्ते [name] 🙏 Pyas mein swagat! Aapki subah ki milk [date] se shuru. Wallet ek baar recharge karein, phir har subah befikr. Kuch bhi ho — yahin reply karein.”
- **Out for delivery:** “Aapki milk raste mein hai 🚲 ETA [x] min. Live track: [link].”
- **Gentle wallet nudge:** “Aapka Wallet thoda kam hai. Recharge karein taaki kal ki delivery na ruke 😊 [link]”
- **Service recovery:** “Kal ki delivery mein kami hui ho to maaf kijiye. Sab theek mila? Batayein, hum turant sudhaareenge.”

G.3 Full AI-call script — Wallet recharge (Morning Delivery)

AI: “Namaste, main Pyas Dairy se AI assistant bol rahi hoon. Aapki subah ki milk delivery ke baare mein 1 minute baat kar sakti hoon?” (if no → “Bilkul, aapka din shubh ho.” end)

AI: “Kal ki delivery jaari rakhne ke liye aapke Pyas Wallet mein thoda balance kam hai. Kya main abhi ek recharge link bhej doon jise ek tap mein use kar sakte hain?”

If yes → “Bhej diya WhatsApp par. Recharge hote hi kal ki delivery pakki. Aur kuch?” If “pause” → “Koi baat nahi, main aapki delivery [date] tak pause kar deti hoon — jab chahein resume karein.”

Guardrail: any anger, refund/payment dispute, or “cancel karo” with frustration → “Main aapko turant hamare team member se jodti hoon.” → transfer. Close: “Pyas chunne ke liye dhanyavaad. Aap kabhi bhi 96672 60050 par baat kar sakte hain.”

H. 90-day pilot plan (prioritised by impact × ease)

Phase	Weeks	Launch	Why now (impact × ease)
Phase 1 — Reliability core	1–3	Order/delivery updates (D), wallet low + failed payment (B1–B3), delivery-skipped (D7), complaint acknowledge (E)	Highest impact, lowest risk — pure service messages, no consent hurdle; protect the pilot's reliability first
Phase 2 — Activation & recovery	3–6	First-order nudge (A1), subscription-not-paid (A5), cart abandon (A4), wallet AI call (F3), payment-failure AI call (F4)	Directly lifts first-order and save rates; AI calls only for high-value
Phase 3 — Retention	6–10	Renewal (B4), pause/churn check-in (C3), poor-experience recovery (C7/E), post-complaint AI call (F6)	Compounding retention as the base grows
Phase 4 — Growth (opt-in)	10–13	Win-back (C2/F8), referral after 5 ★ (E7/F9), promotional offers	Only after trust & reliability proven; strictly opt-in & capped

I. 30-day trigger calendar (one customer's journey)

Day	Morning Delivery subscriber	Quick PyaaS customer
0	Welcome + subscription-start (WA)	Welcome + first-order nudge (Push/WA)
1	First delivery confirmed; "how was it?" (WA)	If ordered: delivered + reorder; if not: reminder
2–3	Feedback check; teach Pause/Resume	Cart-recovery if abandoned
5	If not active: AI activation call (high-intent)	If no order: WA nudge
7	Wallet health check if low	No-order-7d soft re-engage (WA)
10–12	Ghee/basket intro to happy subs (soft)	—
14	—	No-order-14d win-back offer (opt-in)
T-2 renewal	Renewal reminder (WA)	—
On low wallet	T-2 nudge → T-1 SMS → AI call if unheeded	—
21	—	High-value inactive → AI win-back
30	Day-30 retention check; referral if 5 ★	No-order-30d AI win-back (high-value)

Every step is conditional — it fires only if the trigger is true. A happy, active customer may receive almost nothing beyond delivery confirmations. That is the intended outcome.

J. Communications requiring legal / compliance approval before launch

- **DLT registration & templates (SMS/RCS):** register PyaaS as Principal Entity, headers, and every SMS/RCS template with the correct category (Transactional / Service-implicit / Service-explicit / Promotional). Whitelist all URLs. (TALK-Q / TRAI)
- **Promotional content & timing:** all offer/win-back/referral messages need opt-in, DND scrubbing, and the 10 am–9 pm window; legal to approve incentive wording (no misleading claims).
- **WhatsApp opt-in & templates:** Meta-approved utility/marketing templates; documented opt-in; 24-hour service-window rules.
- **AI outbound calling:** commercial-call consent, DND scrub, quiet hours, mandatory identification & opt-out, call recording notice, and the human-escalation list — all reviewed by legal.
- **Data & privacy (DPDP 2023):** consent capture, purpose limitation, data minimisation, retention & deletion, and any data shared with a society app (\$ integration) under a data-processing agreement.

- **Money messages:** wallet, refund, credit and “no money deducted” wording reviewed so it is accurate and non-misleading.
- **Claims discipline:** no unverified purity/health/quality claims in any message or script (carries the playbook's master rule).

K. Launch first, measure, and the recommended 5-7 journeys

K.1 Recommended first 5-7 journeys (pilot)

#	Journey	Why first	Channel
1	Order & delivery updates (D1, D2, D6)	Reliability = the pilot's whole promise; pure service, zero consent risk	Push/WhatsApp
2	Delivery-skipped explanation (D7)	Prevents the #1 trust-killer; turns a miss into a recoverable moment	SMS+WhatsApp
3	Wallet low + failed payment (B1-B3)	Directly protects delivery continuity & revenue	SMS+WhatsApp
4	First-order / subscription-not-paid (A1, A5)	Biggest activation lever in the funnel	Push/WhatsApp
5	Complaint acknowledge + resolve loop (E2, E6)	Builds trust fast; keeps CSAT high during the fragile pilot	WhatsApp
6	Wallet-recharge AI call (F3)	Highest-ROI AI call; saves subscriptions before they lapse	Call
7	Poor-experience proactive recovery (C7)	Catches silent churn the pilot can't afford	WhatsApp

Hold win-back, referral and promotional journeys until Phase 4 — launch them only once reliability and CSAT are proven.

K.2 A/B testing plan

- **Test one variable at a time:** message copy (EN vs Hinglish), incentive size (₹X vs ₹Y), send time (morning vs evening), channel (WhatsApp vs SMS), AI-call time-of-day.
- **Method:** 50/50 split within a segment; minimum ~200 recipients/variant; decide on conversion + opt-out (a “winning” message that raises opt-outs loses).

K.3 Dashboard metrics

Group	Metrics
Delivery & engagement	Delivery rate · read rate · click rate · opt-out rate (per channel)
Conversion	First-order conversion · cart recovery · recharge completion · activation %
Retention	Repeat-order rate · subscription retention (D7/D30) · churn % · win-back %
Recovery	Complaint-recovery % · <24h resolution % · save rate (wallet/payment) · reopen %
AI calls	Connect % · consent % · resolution % · transfer-to-human % · DNC compliance
Business	Revenue & margin impact · cost per channel · incremental orders per ₹ spent

The one rule that keeps this trustworthy

If you are unsure whether to send a message, don't. A reliable delivery and a clear wallet reminder earn more loyalty than ten offers. Communicate when it helps the customer — stay silent when it doesn't.

Prepared for Pyaas Dairy leadership · CRM, Retention & AI-Calling Playbook · 11 August 2026 · working prototype. Register DLT/WhatsApp templates and complete legal review before go-live. Sources: TALK-Q India SMS Regulation guide; TRAI TCCCPR.
